2. HYPER-LOCAL MARKET FEASIBILITY & COMPETITOR MAPPING

Catchment Demographics: Within the 10.0 km radius around Melattur, the estimated rural population is **16,369** across approximately **3,992 households**. The target customer conversion potential is estimated at **2,594 active consumers**.

Competitor Density: Spatial mapping identified **7 commercial units** (Density Rating: **MEDIUM**). *Data Source: Hybrid: OSM + District Panchayat / Udyam Baseline Density (Confidence: MEDIUM-LOW).*

Primary Sales Channels: Local Village Households, Weekly Haat Market, Tea Shops & Rural Dhabas, Block-level Collection Centers.

3. PRODUCT PRICING & VALUE-ADDITION BENCHMARKS

Core Product: Cow/Buffalo Raw Milk (1 Litre) | **Regional Reference Price:** ■54.00 | **Estimated Unit Cost:** ■38.88

Recommended Selling Price: ■52.92 | **Strategy:** Cost-Plus with Premium for Freshness (Target ■52-55/L for doorstep delivery to outprice urban packaged milk)

Value Addition Margins: Paneer (1 kg): ■360, Desi Ghee (1 Litre): ■750, Curd/Dahi (1 kg): ■80

4. TAILORED SWOT MATRIX & THREAT MITIGATIONS

STRENGTHS • Available self-equity of ₹100,000 qualifies for 90% MoSJE concessional credit leverage. • Direct hyper-local proximity to consumers in Melattur minimizes transit and distribution overheads. • Entrepreneur brings 2 year(s) of local operational familiarity in Thanjavur.	WEAKNESSES • Initial margin capital (₹100,000) limits automated bulk processing in early launch months. • Dependence on local spot credit (udhaar) if credit recovery cycles are not strictly enforced. • Limited in-house cold-chain or storage buffer requiring rapid daily turnover.
OPPORTUNITIES • High demand for value-added products: Paneer and Ghee production (35-45% higher gross margin than liquid milk), Direct B2B supply agreements with local sweet shops and tea stalls. • B2B institutional supply linkages with local tea stalls, schools, and eateries in Thanjavur. • Government interest subvention and priority lending access through MoSJE/NBCFDC/NSFDC channels.	THREATS & MITIGATIONS • Local competitor density assessed at 'MEDIUM' in 10.0km catchment. • Raw material & input cost fluctuations: Feed price volatility during dry summer seasons. • Seasonal demand variations during monsoon dips and festive peak cycles.

5. REPAYMENT ROADMAP & YEARLY AMORTIZATION (WITH MORATORIUM)

Year	Principal Repaid	Interest Paid	Total Outflow	Closing Balance
Year 1	₹53,900.54	₹71,108.62	₹125,009.16	₹846,099.46
Year 2	₹114,467.07	₹63,551.25	₹178,018.32	₹731,632.39
Year 3	₹123,967.79	₹54,050.53	₹178,018.32	₹607,664.60
Year 4	₹134,257.06	₹43,761.26	₹178,018.32	₹473,407.54
Year 5	₹145,400.32	₹32,618.00	₹178,018.32	₹328,007.22
Year 6	₹157,468.49	₹20,549.83	₹178,018.32	₹170,538.73
Year 7	₹170,538.73	₹7,480.05	₹178,018.78	₹0.00

6. FEASIBILITY VERDICT & BANKING APPRAISAL

Final Viability Decision: HIGHLY RECOMMENDED — Strong Market & Financial Viability (Viability Score: 93/100, Bankable Readiness: 93%)

Debt Service Coverage Ratio (DSCR): 4.15x (Benchmark: >1.25x for rural term lending).

Appraisal Notes:

- Proceed with loan application submission under MoSJE scheme channel.
- Utilize the initial moratorium period exclusively for setting up customer supply linkages.
